SUMMARY

I am an IT Developer and student at SMK Pangeran Wijaya Kusuma (Software Engineering), passionate about AI, machine learning, backend development, and data analysis. Experienced in building REST APIs (Express.js, MySQL), developing AI models (Deep Learning, Sentiment Analysis, Data Analytics), and creating innovative digital solutions. Always eager to learn, grow, and contribute to impactful tech projects.

WORK EXPERIENCE

- PKL – IT Support & Developer** Nov 2024 - May 2025
- Assisted in maintaining IT infrastructure and troubleshooting technical issues.
 - Supported database management, system updates, and user support.
 - Gained real-world experience in IT operations and software implementation.
- Data Analyst – Bike Sharing Analysis Project** Feb 2023 - Present
- Performed Exploratory Data Analysis (EDA) using Pandas & Matplotlib.
 - Aggregated and visualized datasets to discover key insights about user behavior.
 - Built a dashboard with Streamlit for interactive data visualization
- AI Engineer – Sentiment Analysis Project** May 2025 - Present
- Collected and labeled 10,000+ data samples for sentiment classification (positive, neutral, negative).
 - Trained deep learning models with multiple training schemes to achieve target accuracy of 85%+.
 - Deployed inference pipeline to classify text inputs into sentiment categories.

EDUCATION

- SMKS Pangeran WijayaKusuma** Juli 2023 - Juli 2026
- Specialized in software development, databases, and programming.
 - Actively engaged in AI, machine learning, and backend development projects.
- Dicoding Academy – Machine Learning Scholarship** Nov 2024 - May 2025
- Recipient of Machine Learning Developer Scholarship.
 - Learned Supervised Learning, Deep Learning, NLP, and Model Deployment.
 - Applied skills through real-world projects like Sentiment Analysis.

ADDITIONAL INFORMATION

- Programming & Tools: Python, PHP, JavaScript, Express.js, MySQL, Pandas, Matplotlib, Seaborn, Streamlit
- AI & ML Skills: Deep Learning, NLP, Sentiment Analysis, Data Analytics, Model Deployment
- Web Development: Frontend (HTML, CSS, JS), Backend (REST API, Database Design)
- Soft Skills: Problem-solving, critical thinking, creative project design, teamwork
- Languages: Indonesian (Native), English (Intermediate – technical & professional)
- Notable Projects: StyleIndo REST API, Bike-sharing Data Analysis, Sentiment Analysis, School Profile Video Concept
- Juara Harapan 1 – LKS IT Business Solution
